### Caution and Safety

- This appliance is not intended for use by young children or infirm persons without supervision. Young children should be supervised to ensure that they do not play with the appliance.
- The installation of a residual current device (safety switch), is recommended to provide full safety protection for this electrical appliance.
- If the supply cord is damaged, it must be repaired by the manufacturer or its service agent or a similarly qualified person.
- Please ensure that when using the Boiling Water System the following points are taken into consideration:
  1. Avoid touching the body of the tap as it can reach the temperature of boiling water.
  2. When pouring water into a vessel ensure that it is not too far from the tap as splashing may occur. Do not, however lose sight of the water level in the vessel being filled. .
  3. Avoid placing hands near the end of the vent pipe (this is a precautionary measure as the vent will not emit steam during normal operation).

### Installation & Service

- The Billi Ultra Boiling Water Unit must be installed by a suitably qualified person.
- The Billi Ultra Boiling Water Unit must be installed as per the installation instructions supplied.
- Installation and Service must comply with AS/NZS 3500
- Warranty repairs can only be performed by approved Service Agents – contact the manufacturer for your nearest service agent (refer to details on back cover).
- The Billi Ultra Boiling Water unit is not designed to operate outdoors.
- If a filter is installed a pressure limiting valve must be installed to protect the filter.

### Operation, Care & Cleaning

- Ensure the water supply is turned on.
- Switch the power on to begin the heating and filling process.
- After an initial heating period the supply of boiling water will be continuous (water will only run out if the Boiling Water Unit is used beyond its capacity).
- To open the tap either push or pull the handle. The tap handle is spring loaded – if it is pulled towards the user it will close when released.
- The handle can be locked in the open position if it is pushed fully towards the Boiling Water Unit. It must then be pulled forwards to close.
- If the installation includes a filter assembly the filter cartridge must be replaced every 6 to 12 months depending on the level of usage and water quality.

### Care & Cleaning of your appliance.

- When cleaning the outer case of the appliance, do not use abrasive chemicals or cleaning agents.
- In areas of poor water quality, the outlet of the tap must be periodically brushed to prevent lime scale buildup. Lime scale buildup at the tap outlet will cause the tap to drip.
